# Heart Anatomy

Directions: Name each of the above parts. Color them red if they contain oxygenated blood and blue if they contain deoxygenated blood. Draw black arrows to show direction of blood flow.

- |                              |                           |
